

How Do I Use the Colouring Checklists?

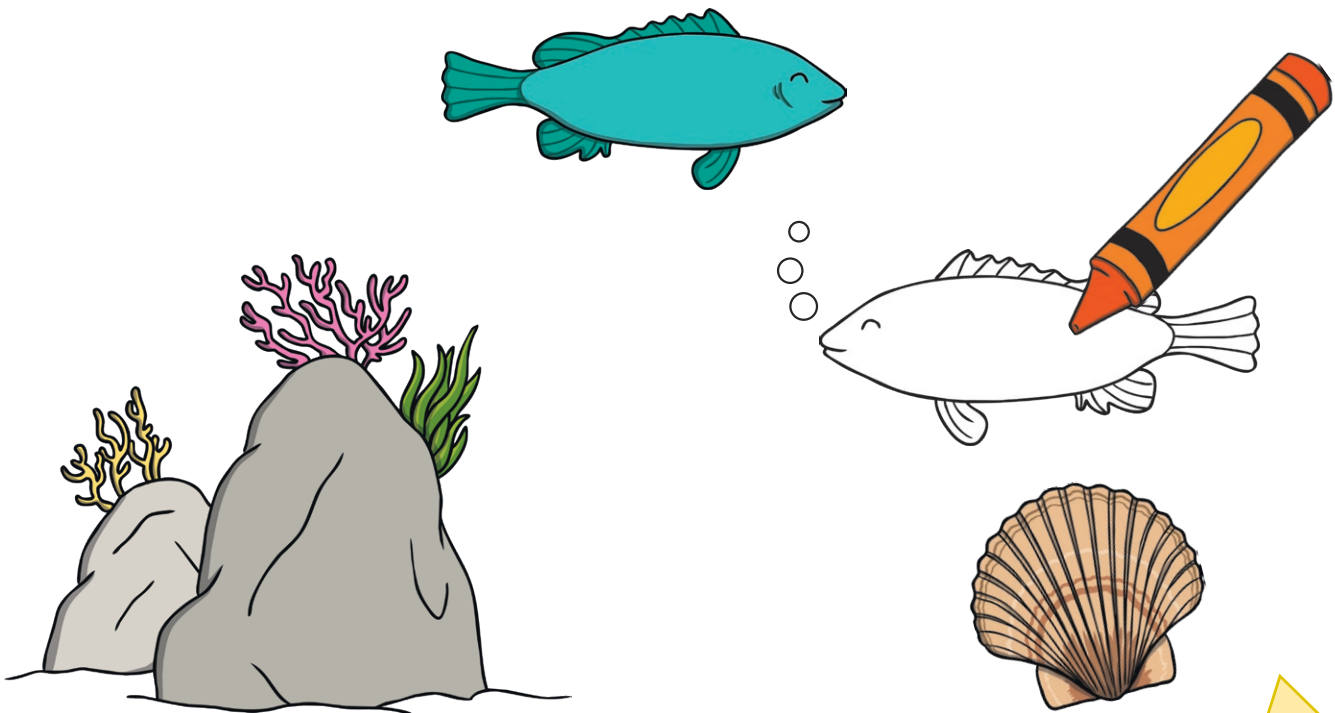

These fun Colouring Checklists have been created for you to use at home with your child.

Look through the different skills together and talk about the things that your child can do to help them get ready for starting school.

You may need to explain some of the skills to your child in a way that they will understand. For example, when thinking about carefully listening to and following instructions, you might like to explain how they could show this at home. You might ask, "When I ask you to tidy away your toys into the toy boxes, can you do it?"

For each skill that your child can do confidently, they can colour that part of the picture in. Then, as they learn new skills, they can colour in more of the picture until it is complete.

Please remember that all children are different and will learn to do each skill at different times. Try not to compare your child with other children. Instead, celebrate what they can already do and think about what they can learn to do next.

Most of all,
have fun!
